Liquid Fuels & Fuel Oil Fee Schedule

(Fees may be subject to change in the event of errors or omissions) All fees subject to HST where applicable

Notes

- 1 All customer requested services to be prepaid (includes flat and minimum fees).
- 2 All prepaid fees are non-refundable
- 3 All minimum fees include specified hours. Excess time above the specified included hours will be billed at the applicable hourly labour rate in ¼ hour increments. All labour rates are per inspector or engineer. Flat fees relating to engineering services or initial inspection may be subject to additional billing if engineering submissions are inadequate or require excessive engineering review/initial inspection time. Overtime rates will apply for services delivered outside normal business hours at the request of the customer.
- 4 A "non-authorization holder" is defined as any person not required to be an authorization holder, or any person who is required under the applicable regulations to hold a valid license, registration, certification or authorization, and does not meet this requirement at the time that the billable inspection occurs.
- 5 Expedited service (inspection) includes customer driven work, incident or compliant work which take the inspector away from previously scheduled work or follow-up inspections related to previous non-compliances. For expedited service, travel time will be billed at actual time. For the purposes of expedited service, the "standard fee" shall be the higher of (1) the fee that would be charged if the inspection were not an expedited service or (2) the sum of actual travel and inspection time multiplied by the applicable hourly labour rate in ¼ hour increments.
- 6 Pipeline strike General inspection activities and associated travel time are included in the flat fee; however, in situations which go beyond normal activities, such as for significant levels of non-compliance, excess inspection and travel time will be billed in accordance with the applicable hourly labour rate.
- 7 Distributors & Transmission pipelines General safety activities (excludes risk based audits) and travel time are included in the authorization fee.
- 8 Examination fees are payable for all examinations and re-writes taken by the candidate, regardless of whether the outcome is a pass or a failure. An exam re-write counts as a separate examination and will be billed accordingly.
- 9 Invigilation fees will be billed on a per invigilator per exam basis. As a result, multiple invigilation fees may be applied for one sitting if two or more examinations are administered simultaneously or two or more invigilators are required to properly administer the examination (i.e. a large number of students and/or multiple rooms are involved). Should a customer request on-site invigilation, the TSSA will determine how many invigilators are required based on the specifics of the customer request. On-site invigilation fees are charged specifically for the service of on-site invigilation, and do not replace or subsidize the regular examination fees that are charged on a per-student basis.
- 10 Licenses and registration fees cover all safety administration and oversight. No separate fees charged for periodic inspections. Inspection billing only occurs when more than one follow-up inspection is required due to non-compliance. Follow-up inspection charges are billed as per the fee schedule.

Version 1.7
